

FOR IMMEDIATE RELEASE

Robert Klob Designs to Release Six ICF Home Plans FREE to Disaster Victims

August 1, 2011 – Chandler, Arizona – The award winning design studio of Robert Klob Designs, Inc. is pleased to announce that it is providing a minimum of 6 stock home plans Free to anyone that was directly affected by the recent outbreak of storms and natural disasters. All of the plans will be designed with Insulated Concrete Forms (ICFs) that offer structural integrity, safety and energy efficiency like no other individual building component.

The homes will offer multiple sizes, amenities and aesthetic features for different budget types. Sizes of the homes will range from 1,200 s.f., 3 bed/2 baths to 2,100 s.f., 5 bed/3bath, and each home plan will contain a full set of plans and details for construction. They are designed to meet the 2006 International Residential Building Code and will exceed the 2006 International Energy Code by more than 30%.

Tornado and Hurricane resistance is paramount to the design process of each home. The ICF wall systems are designed to withstand winds and projectiles over 200 mph. In addition, doors and windows can be upgraded by the owner to provide additional projectile penetration. Furthermore, the walls can offer resistance to moderate flooding & fire for several hours (based on individual manufacturer specifics).

“Once a plan is selected from our website (www.rkdzns.com), a short form will be filled out by the customer. Our team will then customize each set of plans to include the owners name, address and contact information. We can make additional plan modifications, design revisions and code updates per the homeowner’s request. The final plans will be sent as PDF files via an email link for the homeowner to download. If needed, delivery of full size prints is also available. Additional information will be on our website” said Robert Klob, President of RKD.

“The idea for this came from growing up in ‘Tornado Alley’ and watching the devastation after a major storm. I wanted to give back and do something to make a families life a little easier knowing that their home will be safer and at the same time less expensive to live in for many years to come” Mr. Klob added.

ICF Manufacturers, Distributors & Contractors will be able to market the plans to their clients. RKD can customize the plans for promotion by an individual ICF manufacturer to represent their block system in all references to the specified ICF in the plans and details. In Addition, marketing fliers can be created with corporate logos and contact information. Please contact RKD for more information regarding this service.

The plans are not intended for resale and some restrictions and fees may apply. Please visit <http://www.rkdzns.com/FREE-Disaster-Plans.php> for specific details.

About Insulated Concrete Forms

ICFs are an exterior wall system that typically has an insulating panel on the interior and exterior with a core of concrete. There are many different styles and manufacturers of ICFs with distribution sites located throughout the U.S. and Canada. They offer unparalleled performance for energy efficiency and structural integrity.
